About Colby Products

Colby is one of Australia's best known and respected brands of innovative, high quality materials handling and storage equipment. With more than 40 years experience in providing reliable and cost effective solutions, Colby combines the flexibility of a national network of independent distributors, with the resources of global materials handling specialist Dematic.

Colby® products are designed and engineered by Dematic Pty Limited.
"Colby" and the "Colby Chevron Marks" are registered trademarks of Dematic Pty Limited.

Longspan Shelving Solutions

Fit for purpose, light-duty shelving at a value for money price

Colby is proud to introduce Colby Longspan, a new light-duty shelving ideal for general purpose storage applications. Designed to stand alone, or be integrated with Colby's comprehensive range of storage solutions, Colby Longspan meets all relevant safety and operational standards. It is a functional and purpose-designed product and it looks good. Best of all, Colby Longspan offers all this at a tremendous value for money price.

Uprights

Strong section design provides secure and safe storage options from the new Colby Longspan uprights.

Available in a width of 55mm the profiles have been designed to meet Australian design standards.

Shelves

Modular steel shelves are available in a variety of sizes to suit bay width and frame depth. All shelves are provided in high quality powder coated finish in attractive APO grey.

Stiffeners can be integrated into shelves to minimise deflection and ensure optimum load bearing capability.

Step Beams

Ideal for use with steel shelves, our roll-formed tubular step beam profile offers excellent compatibility with standard particleboard shelves and 30mm deep Colby steel RET shelves.

The shelf gives extra strength in longspan applications up to 2.4m shelf width, while retaining strong load carrying capabilities up to 300 kg per shelf.

Frames

Bolted baseplates provide stable load bearing capability without using excess space.

Simple, regular frame bracing arrangements.

Frames are available in a variety of depths up to 800mm
